

Unplaced Content Review

The website copy from **BPS Solutions (Content).docx** has been mapped onto the current Home, About, LP, Packages, Contact, service-detail, Privacy Policy, Terms & Conditions, header, footer, and shared form structure. The text below is highlighted red because the current site has no direct destination for it, or because it contains placeholders that should not be published without a business decision.

1. Standalone Portfolio Page

The site currently has a portfolio section on the Home and LP pages, but no dedicated /portfolio route. The teaser heading and genre controls were mapped; the standalone page copy remains unplaced.

7. About Page Story Timeline

The existing About page design has no matching story-timeline section. This copy was deliberately left out rather than forcing a new section into the page.
